

PRADNESH RAJEEV MOHITE

SENIOR SOFTWARE ENGINEER • HEALTHCARE DATA ENGINEERING

Location: Gujarat, India • Email: pradneshmohite110@gmail.com • LinkedIn: linkedin.com/in/pradnesh-mohite

PROFESSIONAL SUMMARY

Healthcare IT professional with 8.5+ years of experience working with US healthcare data, SQL, data extraction, ETL workflows, troubleshooting, and clinical applications. I bring a strong combination of healthcare domain knowledge and hands-on data engineering experience, with growing expertise in Power BI, Tableau, Python, GCP, and AI-driven analytics.

TECHNICAL SKILLS & COMPETENCIES

Databases & Querying: MS SQL Server, T-SQL Scripting, SQL Server Management Studio (SSMS), Stored Procedures, Advanced Indexing, Query Optimization, Performance Tuning

Healthcare Systems: EMR/EHR Systems, Allscripts Professional EHR, Clinical Workflows, Output Manager, Patient Data Management, healthcare data standards familiarity

Data Engineering: ETL Pipeline Development, Clinical Data Mining, Relational Schema Design, Data Validation, Analytics Reporting, Tableau, Power BI, Advanced Excel

Tools & Frameworks: SQL Profiler, Extended Event Traces, ITIL Framework, ServiceNow, Jira, Service Level Agreement (SLA) Management, Microsoft Azure (Foundational)

PROFESSIONAL EXPERIENCE

Senior Software Engineer

2022 - Present

MRO Corp

Pune, India

- Lead and architect strategic clinical data mining solutions across 50+ healthcare practices, ensuring complete structural data accuracy and strict HIPAA compliance at every phase of the ETL pipeline lifecycle.
- Develop and execute optimized T-SQL scripts for EMR map updates and clinical measure dashboards, consistently achieving a 40% reduction in average query response times via targeted structural indexing and query plan refactoring.
- Troubleshoot recurring healthcare data extraction, schema, mapping, and configuration issues and validate fixes through downstream results.
- Support SQL-driven extraction and ingestion workflows, improve maintainability, and remove hard-coded logic where appropriate.
- Work within healthcare application and data workflows while collaborating with engineering and QA teams on production fixes and data-quality issues.
- Collaborate with Product Managers, Software Developers, and QA Engineering teams to perform technical root-cause diagnostics on data pipeline anomalies, ensuring absolute adherence to strict corporate SLA deadlines.

Senior Support Consultant

2020 - 2022

Allscripts LLP

Pune, India

- Earned progressive professional promotions within 4 years due to top-tier technical delivery, technical data troubleshooting velocity, and client satisfaction rankings.
- Identified and eliminated severe relational database performance bottlenecks utilizing SQL Profiler, Extended Event Traces, and SSMS, accelerating average system troubleshooting and resolution speeds by 25%.
- Managed robust SLA compliance thresholds across 75+ active healthcare systems and enterprise accounts using ITIL-aligned issue tracking and technical escalation frameworks.

Support Consultant / Intern Consultant

Dec 2017 - 2020

Allscripts LLP

Pune, India

- Engineered 100+ customized clinical patient data reports and data views, enabling advanced data-driven operational and clinical decision-making for healthcare providers and clinical administrators.
- Designed and deployed complex Output Manager print templates to regulate clinical printing and secure document faxing workflows across 30+ physical healthcare facilities.
- Conducted detailed system defect analysis and code reviews, resulting in the successful identification, documentation, and release of three confirmed core product hotfixes.

EDUCATION

Master of Engineering (M.E.) in Computer Engineering

Mumbai University

Nov 2021

Mumbai, India

Bachelor of Engineering (B.E.) in Computer Engineering

Ratnagiri / Mumbai University

Aug 2015

India

CERTIFICATIONS & TRAINING

- Microsoft SQL Server Certification: Querying (Exam 70-461)
- Microsoft SQL Server Certification: Administration (Exam 70-462)
- ITIL Foundation Certified – IT Service Management Framework
- Data Analytics Professional Credential – Accenture / Forage

AWARDS & PROFESSIONAL RECOGNITION

- **Employee of the Month (MRO Corp)** – Voted for exceptional engineering performance and measurable client impact across concurrent healthcare data pipelines.
- **Peer-to-Peer Recognition Award (MRO Corp)** – Awarded by fellow software engineering colleagues for outstanding cross-functional collaboration and structural data technical contributions.
- **Beyond the Call of Duty Award (MRO Corp)** – Honored for single-handedly identifying and repairing a critical client data pipeline outage outside business hours, completely preventing a high-exposure corporate SLA breach.
- **Multiple Client Appreciation Awards (Allscripts LLP)** – Received continuous client commendations for exemplary technical database optimization and troubleshooting quality across a 4-year tenure.
